DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statements (IDSs) received 6/24/04 and 08/24/06 have been considered by the Examiner and the initialed copies (two pages) of the IDSs are attached with this correspondence.

Specification

2. The abstract of the disclosure is objected to because the title of the invention in the abstract of the disclosure should be deleted. Correction is required. See MPEP § 608.01(b).

Claim Objections

Claims 2 and 18 are objected to because of the following informalities:

Claim 2: line 2, before generating "said" should be added. Feedback filter coefficient has been claimed before in claim 1, lines 2-3 where claim 2 depends on.

Claim 18: the claimed "means for generating bias of the Fast Walsh Transform system" in lines 5-6 reads as if the system generates a bias after the bias has been cancelled by the "means for canceling the bias" in lines 4-5. Shouldn't the "means for generating the bias be claimed before the "means for canceling the bias? Otherwise as claimed, it reads as if there is a bias remaining not canceled by the means for generating the bias.

Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-19 are allowed.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

The objection to claims 2 and 18 indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent number 5,260,972 and International Patent Application No. WO 03/107534 to Wang and Kim respectively disclose a receiver having means for canceling bias of a corrected codes.
